| | | | | |
| | | Programmed Reassessme | _ | |

Notes to be Read when undertaking Fire Risk Assessment

Location

This can be a single room or group of rooms/block or wing as suits the situation.

Identify the Fire Hazards

These can be identified as one or more of the following;

- 1 The potential for ignition
 - Naked flames
 - Heaters
 - Hot processes
 - Electrical apparatus or equipment
 - Arson risk/site security

1 The potential for fire spread

- Stored materials and their locations (waste, resources materials, paper, chemicals, fuel, etc)
- · Construction materials used.
- Compartmentation of building (fire resisting doors with closers, ceilings and walls etc)
- Potentially flammable fittings (furniture, display boards, books, etc)
- Ventilation levels (natural or mechanical)
- Is the area hidden from view (where a fire outbreak may not be immediately noticed)?

2 The consequences to life

- Occupancy levels
- Age groups
- Level of supervision
- Familiarity with building layout
- Time it takes to evacuate building (including comments as to width and suitability of escape routes)
- Physical and mental disability of particular building users
- Emergency Lighting on escape route (especially if used out of school hours)
- Directional Signage for designated escape routes
- Emergency escape ironmongery to escape routes
- Fire extinguishers type and location/suitability

Identify those People at Risk

Currently these would be one or more of the following groups;

- Children
- Staff
- Directors/Governors
- Visitors
- Lettings
- Extended Schools Users
- People working near the fire danger
- People working alone in isolated areas
- Disabled persons
- The elderly or infirm

Evaluate the Risk

This is assessed from the information gathered above. This could be identified as either LOW or SIGNIFICANT. A SIGNIFICANT for hazard relates to any feature of the premises, its content, the use or the occupants that may have an adverse effect on the means of escape in case of fire resulting in a potential risk to life.

Works / Practices proposed to Remove, Reduce and Protect from the Risks

Where significant risks have been identified, the Academy Trust / Principal should put in place practices/control measures or undertake remedial works that would remove or reduce the risk. These Remedial Works/Practices proposed should be clearly identified on the assessment with timeframes for implementation clearly identified.

Some improvements may not have cost implications (e.g. simplifying a means of escape route by repositioning furniture), improved staff training/procedures etc, but some may require building works to be undertaken. If capital remedial works are required these should be entered on the Academy's Development Plan (Premises) and progressed in the normal manner (capital grant funded works).

Record, Plan Instruct and Train

Record the findings and action you have taken. Discuss and works with other responsible persons in the organisation.

Use the information gathered to prepare an **Emergency Plan** for the building.

Inform and instruct relevant people that use the premises and provide/arrange for the necessary fire safety training.

Review

Review the Fire Risk Assessment regularly (at least annually) and following any proposed changes to the building, change of room uses or introduction of new users (extended schools) or significant changes in pupil numbers.

APPENDIX 1

Emergency Fire Plan Checklist

| Tick √column if covered. N/A if 'not applicable' | √ or N/A |
|---|----------|
| 1. Adequate provision of Fire Action Notices posted by all final exits and call points | |
| 2. Method for calling the emergency services | |
| 3. Practice and document suitable evacuation procedure for the premises, relevant persons, associated hazards and risks. Ensure staff react Immediately. Ensure staff react immediately when alarm sounds (aim to evacuate in 2 ½ minutes). Ensure staff are aware that no one returns to the building unless permission has been granted by the Fire Officer/ Police Office. | er |
| 4. Provision of clearly identified external assembly points | |
| Clear identification of escape routes with appropriate signage and markings i Compliance with the Health and Safety (Signs and Signals) Regulations 1996 BS 5499 | |
| 6. Provision of adequate and appropriate fire fighting equipment and signage | |
| 7. Clear Description of employee duties | |
| 8. Employee training | |
| 9. Plans and provisions for the evacuation of those at particular risk | |
| 10. Site policy and procedure for the use of emergency equipment in the event of an emergency | of |
| 11. Include any high risk areas / equipment in the plan and clearly identify (e.g. gas valves, electrical switch gear, chemicals and fuels) | |
| 12. Liaison with the emergency services including provision of appropriate information in the event of an emergency | |
| 13. Establish process for briefing visitors / contractors. Work Permit) For additional help and guidance, contact the Asset Management Helpdesk on 01752 30456 | 38 |
