

Grow – Informal Worship overview

21st century worship has many different facets, and we can often fall into 'informal worship' without considering what that means, or how it can be best worked out.

Meeting on zoom over two sessions, this course aims to empower people to make informal worship a high point of our worshipping calendar, not just something that fills gaps. We will focus on using prayer, scripture, music and the space, while finding new ways to encourage congregations to worship and think, be inspired and empowered, be thoughtful and contemplative.

There are no prerequisites for this course, and is open to all, whether experienced or brand new to faith, or if you're already fulfilling this work, or thinking about undertaking it.
